

University of Arkansas Gifted and Talented Scholars Program

The program is under re-organization, but students in grades 6-12 are eligible by being in the top 90th percentile on a nationally-normed test and/or being identified for a gifted program in their district.

The program usually hosts summer enrichment opportunities in the areas of fine arts, sciences, mathematics, and technology—these will resume in 2011.

The U of A College of Engineering will be hosting summer programs this year. See www.engr.uark.edu/summerprograms
